

2012 Summer Internship Program - JAPAN

BlackRock® is one of the world's preeminent asset management firms and a premier provider of global investment management, risk management and advisory services to institutional, intermediary and individual investors around the world.

Our eight-week Summer Internship Program provides high-potential college students in their penultimate year with a challenging, meaningful and supportive opportunity to learn about finance and asset management while gaining valuable hands-on experience. Internship program participants attend orientation which provides a thorough overview of the organization and features prominent speakers, including many of BlackRock's senior leaders. The program includes a weekly senior speaker series, mentoring and informal networking activities with BlackRock professionals.

As BlackRock's internship program is the primary feeder to the Analyst and Associate programs, our goal is to identify qualified students who are interested in becoming full-time BlackRock employees upon graduation.

Positions: Global Client Group, Portfolio Management Group, BlackRock Solutions
Type: Summer Internship
Primary Location: APAC-Japan-Tokyo
Duration: maximum 8 weeks
Start date: July
For Application: Apply online through our career site at : www.blackrock.com/careers

Global Client Group - Within the Global Client Group, we pride ourselves on creating, communicating and delivering investment solutions for clients worldwide. To that end, we have teams of professionals with expertise in the many functions that combined make this effort successful and sustainable, including relationship management, marketing, sales, client service, and product development and management.

The Global Client Group serves institutional and retail clients, including; pension plans, insurance companies, third-party mutual funds, endowments and foundations, charities, corporations, official institutions, banks, family offices, financial professionals and individual investors. It is a high-energy, high-paced role and is your opportunity to understand and be part of the end-to-end asset management business.

Portfolio Management Group - BlackRock offers a range of investment products—equity, fixed income, liquidity and alternative investment—each managed by a dedicated investment team of portfolio managers, research analysts and traders. BlackRock's investment teams are staffed with professionals who have significant experience within their respective markets. Our portfolio teams manage assets for institutional and individual investors alike.

All of our portfolio managers leverage the expertise of other investment teams through the strength of a shared research, trading and risk management platform. Our investment professionals benefit from the resources of a world-class firm that continually invests in its business and is differentiated by a team approach and integrated research and risk management.

BlackRock Solutions - BlackRock is widely recognized for its disciplined investment process and rigorous risk management. Since its inception, we have focused on the assessment of security- and portfolio-level risks for investment decision making as well as for efficient transaction execution. As a result, BlackRock developed an integrated suite of investment management tools.

In 2000, BlackRock began offering these risk management and trade processing tools to external clients under the BlackRock Solutions® (BRS) brand hereby delivering its technology infrastructure and analytics to large, sophisticated institutional investors. Through BRS, we offer risk management, strategic advisory and enterprise investment system services to clients with portfolios totaling over US\$13 trillion. The BRS business is the natural evolution of our long-standing investment in developing sophisticated and highly integrated analytics and systems for managing money.
