What Parents say about St. Mary's

“When we were living in Singapore, we had the opportunity to hear Dr. Michael Thompson, an internationally acclaimed child psychologist, speak highly on the benefits of an all-boys school. These schools understand how **BOYS LEARN DIFFERENTLY** from girls, and need to be able to release a lot of **ENERGY** throughout the day. When we moved to Japan, St. Mary's was an obvious choice for our two very active boys, with the perfect combination of academics and athletics. The **SWIMMING** program was the clincher at the time, but our boys have gone on to also enjoy other sports, the **AMAZING CHOIR**, and much much more. All on a good-sized campus in a wonderful neighborhood in Tokyo.

Parents of G4 & G9 Boys, USA

“St Mary's International School certainly lives up to its reputation of being a school of **HIGH ACADEMIC EXCELLENCE**. A school however, is not just about academics and this has never been more true than during these difficult times that we have all faced with COVID-19. An excellent and comprehensive “**AT HOME LEARNING**” programme was established, with a daily routine of assignments and feedback, either in form of classroom meets or individually. Specialist teachers stepped in where needed and counsellors were there for my son and even myself. I am humbled to have seen such **DEDICATION** and **COMMITMENT** to the education and well-being of my son. Yes, St Mary's is a demanding school, but it is also **NURTURING** and developing talents with wonderful, committed and motivated teachers.

“

...what I like most is the **DEDICATION** of the teachers. The teachers are very **COMMUNICATIVE** with us and our family...and always let us know how my son is doing and let us know when he has homework, and they are very, very responsive towards any requests we have...we've enjoyed that very, very much and very, very much appreciated. "

"...really good for me as a father to be able to be **INVOLVED** using my connections (as a NASA Attaché) and my background to help inspire students..."

"...St. Mary's has been a very integral part of our experience here in Japan and we enjoy going to St. Mary's for different activities. My son enjoys...soccer on the weekends, enjoys swimming, and being with his friends and soon he will start after-school basketball. The combination of physical activities and **SPORTS** and in coordination with very **RIGOROUS ACADEMIC PROGRAM** of St. Mary's is something that I think will be very beneficial to him as he continues to study, as he continues his career in the future.
